## **FOR IMMEDIATE RELEASE**

### **AERC.com, Inc. Announces Acquisition of Secure Data Destruction and Disposal Operations**

**Flanders, NJ -- January 7, 2008** – AERC.com, Inc., one of the leading full-service Secure Data Management and Recycling Companies in the US, announced that it has acquired from DynTek, Inc. (DYNK.PK), its Secure Data Destruction and Disposal (SDDS) operations.

The terms of the sale include the transfer of DynTek’s proprietary Secure Asset Management Software Program, related intellectual property and the Company’s Statewide Secure Data Destruction contract with the Commonwealth of Virginia to AERC. AERC has served as DynTek’s primary subcontractor on the Virginia contract for the past three years.

“DynTek’s SDDS operations are a perfect complement to Com-Cycle, our electronics recycling business unit and a logical step in our growth that calls for expanding our footprint, strategic acquisitions, business combinations, and joint ventures” said Peter J Jegou, AERC and Com-Cycle’s Chief Executive Officer.

Lindsay Landmesser, Vice President of Sales added “With our business volume, solution focus and recycling sales and management expertise, the Company can capitalize on this business through the expansion of opportunities within the Virginia SDDS contract and the use of the Secure Asset Management Software Program in other areas as well.”

“Our strategic focus is on growing, managing and supporting profitable field operations that align with our core competencies,” said Casper Zublin, Jr., DynTek’s Chief Executive Officer. “SDDS is outside of our core business. We do look forward to partnering with AERC on future SDDS opportunities within our customer base, including adding them as a service line on our GSA schedule.”

#### **About AERC Recycling Solutions**

AERC Recycling Solutions has become an industry leader through our partnerships with our clients by providing unmatched convenience, regulatory compliance and expert consulting to handle Universal Waste issues. Com-Cycle was started in 2001 by AERC to help service customers with electronics recycling needs. Com-Cycle offers complete computer and electronics recycling services with a Zero-Waste-to-Landfill Policy. We offer compliance with Federal, State, and Local regulations as well as Secure Data Destruction for your electronic data drives. We provide an array of services including Secure Data Destruction and Management, Total Asset Management and End-of-Life Electronics Management. With our own fleet of GPS tracked trucks we provide delivery confirmations and in-house management of logistics for our clients and can provide an audit trail for compliance with data security and environmental laws.

We provide “chain of custody” of assets for clients with coverage throughout all major markets in the United States, with plans to open three new facilities strategically located across the United States within the next twelve months.

AERC has recently secured funding and is looking for acquisitions, business combinations, and joint ventures in our respective market, in particular companies that possess strong management with industry knowledge,
